

EvenAir® WiFi Thermostat Set Up

THERMOSTAT WITH AIRFLOW CONTROL

The EvenAir WiFi thermostat controls heating, cooling and AIRFLOW to the sleeping and living areas in a home and provides remote access to your HVAC system using a smart phone, tablet or PC.

Setting up your WiFi Access is completed in four easy steps:

1) Set Up Your EvenAir WiFi Account

In Step 1 you will go to the EvenAir WiFi website and set up your EvenAir WiFi account by entering a username and password.

2) Turn the Thermostat WiFi On

In Step 2, you will turn the thermostat WiFi on by accessing the user menu in the thermostat and turning on the WiFi options. The thermostat will broadcast its WiFi network address that you will connect with in Step 3.

3) Set Up the WiFi Connection

In Step 3, you will connect to the thermostat WiFi network through your WiFi settings in your smartphone or PC.

4) Connect to your Home WiFi Network

In Step 4, you will connect your WiFi thermostat to your home WiFi network.

Once your WiFi access is completed, you can log in to the EvenAir WiFi website and do the following:

View or Change your EvenAir Account Settings.

Entering your account information is optional and can be done anytime.

View or Change your EvenAir Thermostat Settings

There are a number of settings that can be viewed or changed from anywhere, using a smartphone, tablet or PC. For a complete list of settings that can be viewed or change, see page 4 of this manual.

1 Set Up EvenAir WiFi Account

 Google Chrome web browser works best for access.

1. Open Google Chrome on your smart phone or PC.
2. In the address bar, type the following:

www.evenaircomfort.com

 Apple product users may need to type the following:

http://www.evenaircomfort.com

3. Touch **Register Here** to set up your account.

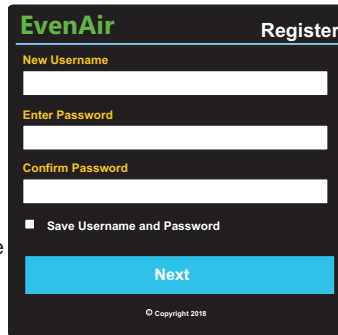

4. Enter a Username

5. Enter a Password
Password is case sensitive

6. Reenter Password

Do not check the Save Username /password box at this time.

7. Touch NEXT.

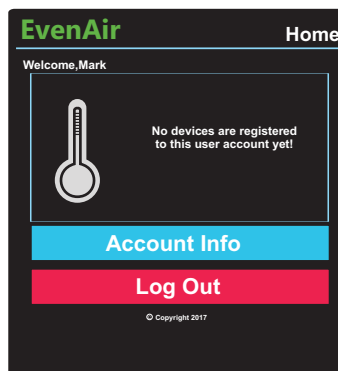

Record the Username and Password for future reference.

_____ User Name

_____ Password

The EvenAir Home page is displayed.

8. Close the browser window to proceed with setting up your EvenAir WiFi thermostat.

2 Turn Thermostat WiFi On

Turning the thermostat WiFi on starts the linking of the WiFi thermostat to the home's WiFi network.

1. Touch the **MENU** key to access User Options.
2. Continue to touch and release the **MENU** key until nEt is displayed.

This option turns WiFi on or off.

3. Touch the **UP** key to select On.
4. Touch the **MENU** key to display the linking option, indicated by Lnc.

5. Touch the **UP** key to select On.

6. Touch the **ENTER** key to save.

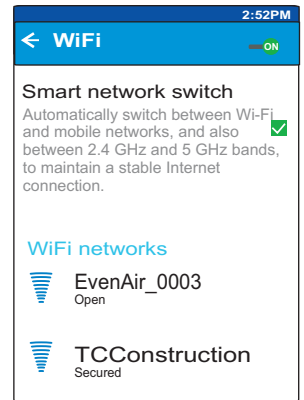

"WiFi" will blink, indicating the thermostat is ready to link with the home router.

3 Setting Up WiFi Connection

1. Open your WiFi settings on your smart phone or PC to display the available networks.

2. Select the **EvenAir WiFi** network. The name will be something like:

EvenAir_####

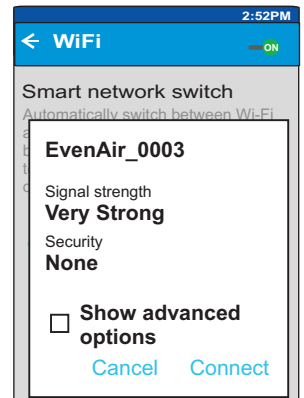

where #### is a randomly assigned 4 digit number.

3. Select **CONNECT**.

If you receive the following message:

"Internet May Not Be Available"

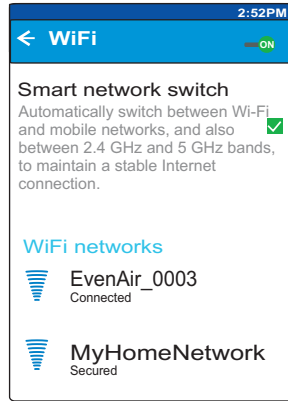

Touch OK.

3 (Continued) Setting Up WiFi Connection

The EvenAir WiFi thermostat WiFi network displays CONNECTED.

4. Close the WiFi Settings page.

4 Connecting To Home Network

1. Open Google Chrome on your smart phone or PC.
2. In the address bar, type the following:
192.168.8.2

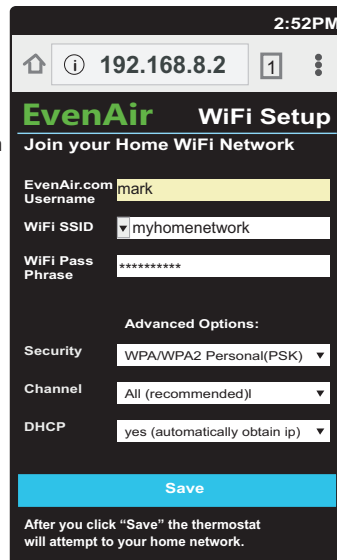

Apple product users may need to type in the following:

http://192.168.8.2

The WiFi Setup page will be displayed.

3. Enter your EvenAir Username in the "Username box", if not already displayed.
4. Select your WiFi network from the pull down menu, if not already displayed.
5. Enter your WiFi password, if not displayed.
6. Touch or click SAVE.
7. When the following message appears, Touch or click OK.

192.168.8.2 says:

Settings were saved to the thermostat, the thermostat has returned to operating mode, you may close this page.

OK

8. Close the browser window.

Use Advanced Options only if your network requires advanced settings and you are familiar with these settings.

4 (Continued) Connecting To Home Network

Once connected, WiFi will display continuously.

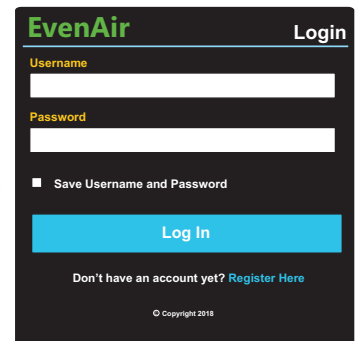

If you are having trouble connecting, close the browser window. Repeat Steps 2, 3 and 4 and then try connecting again.

9. Check to make sure your WiFi has reconnected to your network.

Remote Thermostat Access

1. Open Google Chrome on your smart phone or PC.
2. In the address bar, type the following:
www.evenaircomfort.com
3. Enter your Username.
4. Enter your Password
5. Select Save Username and Password for easy log in next time.
6. Touch or click Log In to access your thermostat.

It may take a moment to display your thermostat information.

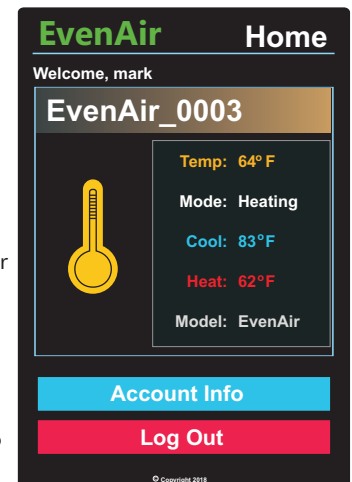

View or Change Thermostat Settings

Once displayed, touch or click anywhere in the box to view or change your thermostat settings. See page 4 of this manual for more information.

Fan Ventilation mode, Indoor RH Setpoint and EconoCooling mode are only displayed if these options have been enabled by your installer.

View or Change Account Info

Touch or click **Account Info** to view or change your account information. See page 4 of this manual for more information.

View / Change Thermostat Settings
