

### Communicating, Programmable Thermostat with Airflow Control

The EvenAir® Whole House Comfort Control System works with the heating and cooling system in one and two-story homes to bring temperature balance to the home.

EvenAir® system thermostat monitors the temperature in the living area and temperature at the sleeping area sensor(s) every two minutes during heating and cooling modes. The area comfort dampers will automatically adjust by 2% when area temperatures are uneven. The EvenAir® system thermostat will modulate air delivery to balance temperatures throughout the home.

- Connects to the H32 Wiring Hub using existing or new 4-conductor thermostat cable.
- Compatible with gas/electric equipment with 2H/2C, conventional or dual fuel heat pump with 3H/2C.
- Vent Mode circulates air within the home when the system isn't calling for heating or cooling. Ideal when using an air cleaner or purification system for a healthy home.
- 5/2-Day programmable.
- High definition, 8.90 sq. inch touch screen display
- Size - 4.68 in. x 4.30 in. x 1.07 in.
- Easily upgrades to WiFi version using same subbase.
- 5-Year Warranty.

#### Premium Whole House Comfort

Provide true Whole House Comfort by integrating whole house fan control, fresh air control and humidity control into the EvenAir® Whole House Comfort Control System.

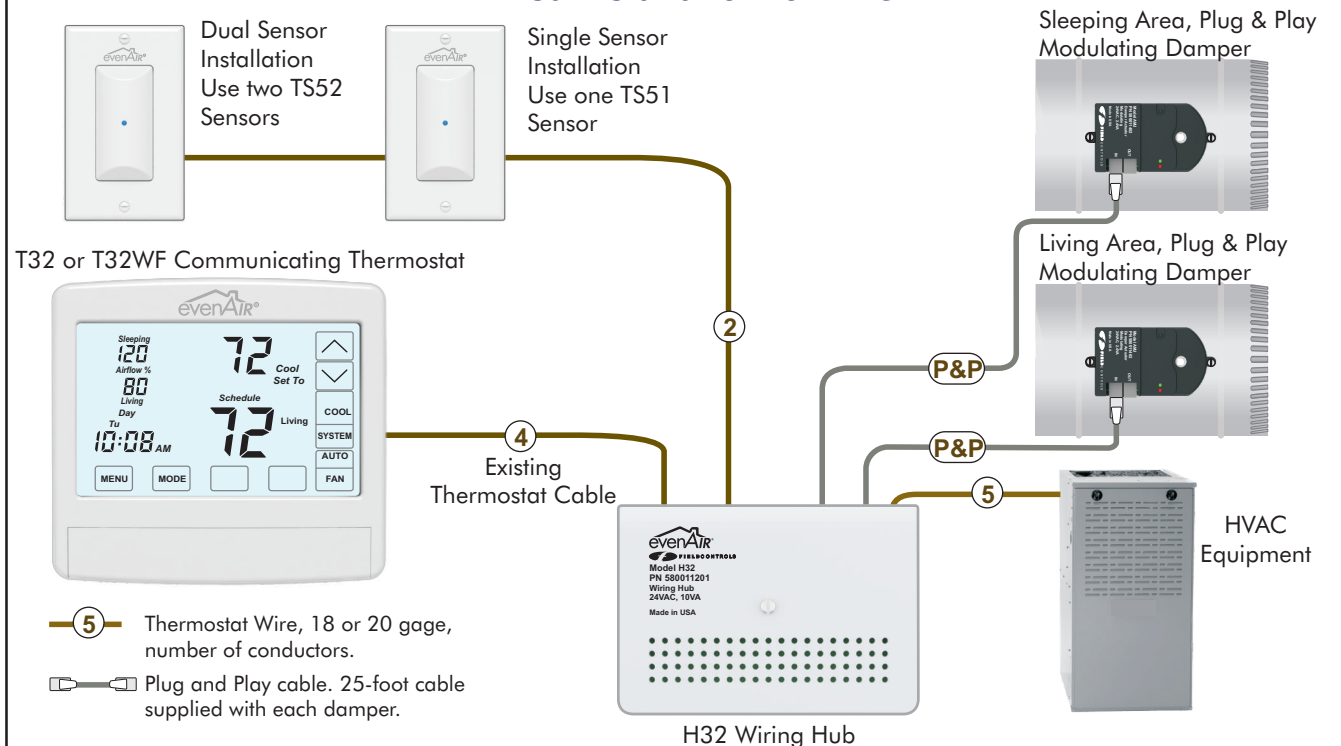

- Whole House Fan Control brings in cool air using a 1 to 12 hour timer set at the thermostat or by true temperature control.
- Fresh Air Control for a healthy home that meets ASHRAE 62.2 requirements.
- Humidity Control for a comfortable home during the heating and cooling season.
