

ClearWave

CLEARWAVE®
Salt Free Water Conditioner

“ **ClearWave protects plumbing and appliances by eliminating scale build up in hard water.** ”

WHY DO YOU NEED SCALE PROTECTION?

Hard water is calcium build up, more commonly known as scale. When scale accumulates, it clogs and corrodes pipes, fixtures and critical components of your appliances. Water softeners and water filters are typically used to prevent scale, but these systems are expensive and require constant maintenance.

WHY FIELD CONTROLS BRAND?

Field Controls ClearWave prevents calcium and magnesium from forming scale in hard water plus helps reduce scale buildup. ClearWave uses microprocessor technology to generate a series of electromagnetic waves that excite the calcium and magnesium molecules. These excited molecules remain in suspension, keeping them from bonding to each other or to pipes, fixtures, appliances or any other surface that encounters the water. ClearWave has been 3rd-party tested and proven effective. Installation is simple and there is no plumbing required. Plus, it is maintenance free.

CONTRACTOR BENEFITS:

Simple Installation

- Complete kit, no additional parts required
- Installs onto water intake with no plumbing
- Works on galvanized, copper or plastic piping

Eligible for Contractors Rewards program

HOMEOWNER BENEFITS:

Plumbing & Appliance Protection

- Maintenance free, works 24/7
- Reduces corrosive green and white scale residue on sinks, faucets, toilet bowls, bathtubs, showerheads, glass, tile and shower doors
- Make soaps lather better when showering, doing laundry, and running the dish washer
- Reduces scale residue on glasses, plates and cutlery so everything sparkles
