

Media Air Cleaner Custom Colors

“ Our Media Air Cleaners™ are available in a range of colors to match existing HVAC brand equipment or your color preference along with custom labeling to promote your company and differentiate your brand and business. ”

WHY DO YOU NEED A MEDIA AIR CLEANER IN CUSTOM COLORS?

Standing out from the competition means getting your company brand noticed and remembered. If your business offers air filtration, your product should include an efficient filter in a quality built cabinet. As an integral part of the HVAC system, it can now match the look of the adjacent equipment. Properly labeled, the filtration cabinet should promote replacement filters purchased through your company long after the installation. It makes it easy for your customers to call you back for routine maintenance and referrals.

WHY FIELD CONTROLS MEDIA AIR CLEANER IN CUSTOM COLORS?

Field Controls Media Air Cleaners Custom Color program allows you to add value to whole house filtration system installations. When you install an HVAC system from Carrier, Trane, Bryant or any other of the major system brands, adding filtration in a matching custom color makes a homeowner's equipment look coordinated. You get all the benefits of a Field Controls Media Air Cleaner in a color that matches major brand equipment. Custom Color also allows you to brand our Media Air Cleaners in your desired color choice and label design. We offer custom powder-coat paint colors for our Media Air Cleaner cabinets that match OEM equipment:

- Equipment Grey (Ducane, Carrier, Rheem)
- Appliance Matte Grey (Armstrong, Daikin)
- Goodman Grey (Amana)
- Trane Green
- Bryant Tan
- Universal White
- York Champagne (Luxaire, Coleman)

CONTRACTOR BENEFITS:

- Ease of installation will boost sales revenues
- Dependable models that meets ANSI/ASHRAE 52.2 standards
- Robust metal construction is durable for any installation
- Premium powder coat appliance finish will reinforce your reputation for quality
