

UV-Aire® Ultra Violet Air Purifiers

“UV-Aire protects your HVAC system, home and family by significantly reducing airborne bacteria, viruses, fungi and mold.”

WHAT IS A UV WHOLE HOUSE AIR PURIFICATION SYSTEM & WHY DO YOU NEED IT?

UV-Aire uses high intensity ultraviolet (UVC) lamps to reduce airborne germs and purify the air as it circulates through the HVAC system. When installed above or below the AC coil, UV-Aire works to keep the coil free of biofilm so the HVAC system works more efficiently.

WHY FIELD CONTROLS BRAND OF UVCs?

UV-Aire Purification Systems feature a powerful, energy efficient UVC germicidal lamp. The compact design allows for easy installation in tight spaces. Systems include unique features such as Twist-n-Lock™ safety switch that turns the unit off when replacing the lamp, deflector shield concentrates UV light on AC coil, and a view port. With over 9 models to choose from and over 100,000 units sold, UV-Aire purifiers are proven to be reliable, durable and effective. All units are UL listed.

CONTRACTOR BENEFITS:

Simple installation

- No additional parts required
- Installation template provide
- 9 models, 24V or 120V models
- Built-in safety switch
- Easy lamp replacement
- Eligible for Contractors Rewards program

HOMEOWNER BENEFITS:

Comfort & Health

- Sterilizes or neutralizes most contaminants
- Helps reduce asthma and allergy irritants

Save on Energy Costs

- Energy efficient, low energy consumption
- Keeps AC coil free from organic toxins
- Enables AC to work more efficiently
