

VentCool™ Whole House Fans

“VentCool Whole House Fans are an efficient, cost effective way to provide Free Cooling for homes.”

WHAT IS A WHOLE HOUSE FAN & WHY DO YOU NEED IT?

A Whole House Fan is centrally located in a home and is turned on with a wall switch to pull cool air in and push hot stale air out. It delivers **Free Cooling** by drawing in **Free** nighttime air to **Cool** the home. Whole House Fans save on cooling costs, are low maintenance, and simple to operate.

WHY VENTCOOL BRAND OF WHOLE HOUSE FANS?

VentCool Whole House Fans improve a home's ventilation by quietly drawing in and distributing fresh cool night-time air through open windows while exhausting stale warm air into the attic. Our fans are ultra quiet, efficient, and offer homeowners total comfort control.
