

Comfort & Protection Plus Promo

COMFORT

RESIDENTIAL STEAM HUMIDIFIER
The Humidifier offers maximum comfort during the dry winter heating season. The Humidifier operates any time there is a call for humidity, not just when there is a call for heat.

PROTECTION PLUS

CLEARWAVE
ClearWave electronic hard water treats the entire water system in the home to help prevent and reduce hard water scale formation. Plus it will help protect other appliances like dishwashers, water heaters, washing machines, and more.

PROTECTION

ZINC ANODE
The Z100 anode acts as a sacrificial metal. If your customer has hard water, the minerals in the water will cling to the anode instead of components inside the humidifier.
