

PROTECT YOUR FAMILY, HOME, AND HVAC SYSTEM

For your Family

- Removes asthma and allergy irritants like dust, pollen, and pet dander
- Reduces bacteria, mold, and viruses
- Keeps air FRESH, CLEAN, and PURE all year round
- Vigorously attacks odors and erases airborne toxins
- Helps improve the air in your home while providing comfort and peace of mind

For your HVAC System

- Reduces particulates and dust that can lower the efficiency of your heating and cooling system
- Eliminates mold and fungi growth (Biofilms) on cooling coils
- Operate your heating and cooling system at peak performance with our high efficiency filtration and high intensity UVC germicidal products for reliability you can depend on

YOUR HOME DESERVES THE BEST AIR PURIFICATION

BETTER AIR FOR BETTER LIVING

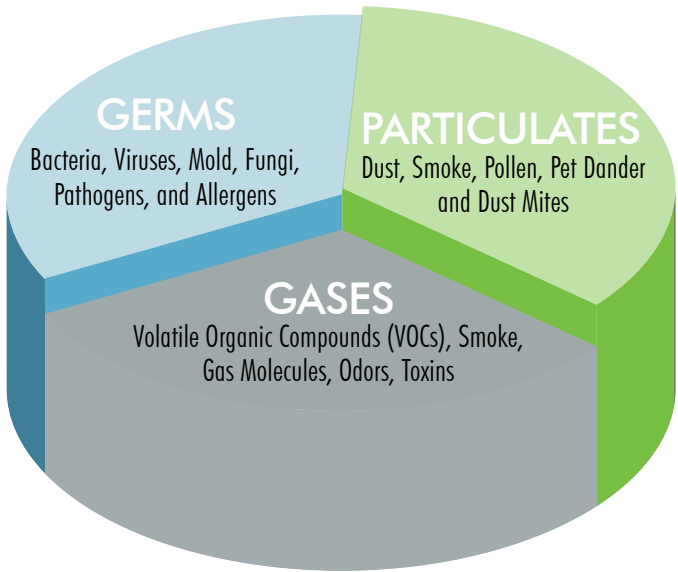

Indoor air is filled with particulates, gases, and germs that can cause illness and aggravate asthma and other respiratory problems. The Healthy Home System® is a whole-house indoor air quality solution that leaves air FRESH, CLEAN, & PURE™ by addressing the three main allergy triggers. The Healthy Home System® keeps any HVAC system running at top efficiency, which means less maintenance and reduced energy costs.

TOP THREE ALLERGY TRIGGERS

Asthma and allergies strike 1 out of 5 Americans according to the Asthma and Allergy Foundation.

According to the U.S. Center for Disease Control (CDC), indoor air contains three types of pollutants: Germs, Particulates, and Gases. This pollution is a major source of allergic reactions

- 35% of allergic reactions are due to Particulates
- 34% of allergic reactions are due to Germs
- 31% of allergic reactions are due to VOCs

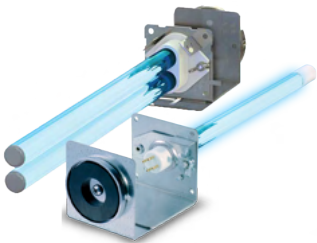

Particles such as dust, smoke, pollen, pet dander, and dust mites are too small to see with the naked eye, but they can be a major problem for those with allergies and asthma.

Germs aren't always visible, there could be bacteria on surfaces at home or other places where people gather like schools or offices. High intensity UV energy is a great solution.

VOCs or volatile organic compounds are airborne toxins that cause allergic reactions due to off gassing of household cleaners, paints, air fresheners, and other sources.

FlexMountUV

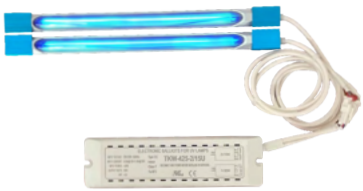

The FlexMountUV® whole house air purifier is a flexible design that applies to any HVAC system to improve your indoor air quality by eradicating bacteria and mold growth on AC cooling coils.

UV-Aire

Keep your indoor air safe and healthy. Install a UV-Aire air purifier on your heating cooling system and prevent bacteria, mold, and viruses from spreading throughout your home.

MiniSplitUV

The MiniSplitUV is a powerful, low-maintenance UVC light that will irradiate the cooling coil and motor to keep it free from fungi and mold.

DUO

The DUO air purification system reduces airborne viruses, bacteria, odors & toxic gases from your home with PRO-Cell Technology.

TRIO

INNOVATIVE BIOANALYSIS

Model UV-16/120 & Model DUO-2000 with PRO-Cell™ Technology showed significant capabilities in neutralizing active SARS-CoV-2 USA-CA1/2020, indicating a 99.99% net reduction after 2.5 seconds of exposure to the UV-C lamp.

The TRIO 3-in-1 induct purification system combines FRESH, CLEAN, & PURE technologies to protect your family from indoor pollutants. The TRIO efficiently captures particulates with MERV13 filtration and our PRO-Cell™ Technology will significantly reduce viruses, bacteria, and toxic gasses in your home.
