

EvenAir® WiFi Thermostat Set Up

THERMOSTAT WITH AIRFLOW CONTROL

The EvenAir WiFi thermostat controls heating, cooling and AIRFLOW to the sleeping and living areas in a home and provides remote access to your HVAC system using a smart phone, tablet or PC.

Setting up your WiFi Access is completed in four easy steps:

1) Set Up Your EvenAir WiFi Account

In Step 1 you will go to the EvenAir WiFi website and set up your EvenAir WiFi account by entering a username and password.

2) Turn the Thermostat WiFi On

In Step 2, you will turn the thermostat WiFi on by accessing the user menu in the thermostat and turning on the WiFi options. The thermostat will broadcast its WiFi network address that you will connect with in Step 3.

3) Set Up the WiFi Connection

In Step 3, you will connect to the thermostat WiFi network through your WiFi settings in your smartphone or PC.

4) Connect to your Home WiFi Network

In Step 4, you will connect your WiFi thermostat to your home WiFi network.

Once your WiFi access is completed, you can log in to the EvenAir WiFi website and do the following:

View or Change your EvenAir Account Settings.

Entering your account information is optional and can be done anytime.

View or Change your EvenAir Thermostat Settings

There are a number of settings that can be viewed or changed from anywhere, using a smartphone, tablet or PC. For a complete list of settings that can be viewed or change, see page 4 of this manual.

CONNECTING WIFI

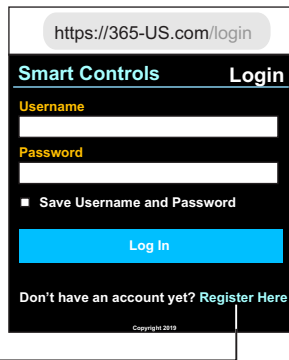

1 Open the account Login Page on a smart phone, tablet or PC.

- Open a web browser. Google Chrome is recommended.

- In the address bar, type
365-us.com
For Android or Apple phones.
http://365-us.com
Some Apple phones may need to use this address.

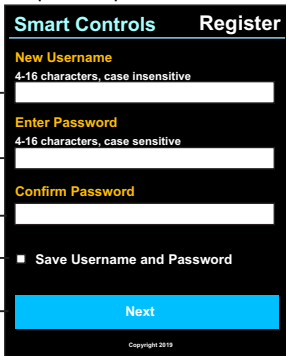

- Press GO to open the Login page.

- Click [Register Here](#) open the Register page.

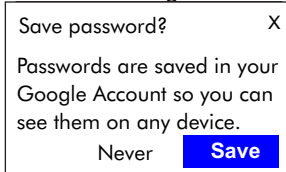

Username is 4 to 16 characters (letters and numbers only) and not case sensitive. Password is 4 to 16 characters (letters and numbers only) and is case sensitive. Keep it simple.

- Enter a Username.
- Enter a Password.
- Confirm Password.
- Select "Save Username and Password".
- Click NEXT to open the Home page.

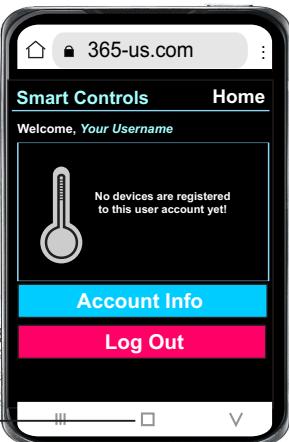

Record your Username and Password on Page 1.

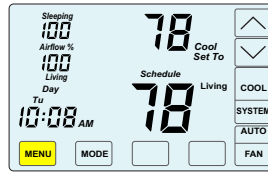

- Google may display the following message. To save your account password in Google, select SAVE. Or, press X to close the message.

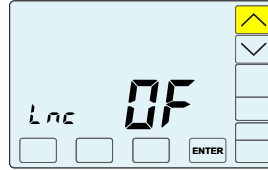

- Tap the Home button on your device to close the browser window.

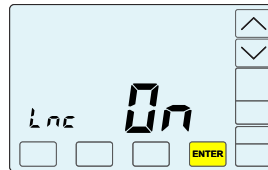

2 Broadcast the WiFi Network

Touch and release the **MENU** key until the linking option, Lnc, is displayed.

Touch the **UP** key to select ON.

Touch the **ENTER** key to save. WiFi on the display will blink. Continue with the linking process.

This option is only used during the linking process and reverts back to Off once the menu is closed.

3 Set Up WiFi Connection

- On your device, tap the Settings icon to open the Settings page. Select WiFi or something similar to display the WiFi settings page. Tap WiFi to open the page that displays the available WiFi networks.
- Find one of the following networks (the last 4 digits will vary):

365cfg
or
C365T21WF_XXXX
or
SmartControlscfg_XXXX

- Tap the network to set as your Current network or your Connected network..
- Once connected and displaying as the Current network, tap the Home button on your device to close the Settings page.

If you receive a message about staying connected, select **Stay Connected**.

CONNECTING WIFI

4 Connect WiFi Network

- Open a web browser. Google Chrome is recommended.

- In the address type:
192.168.8.2
For Android or Apple phones.

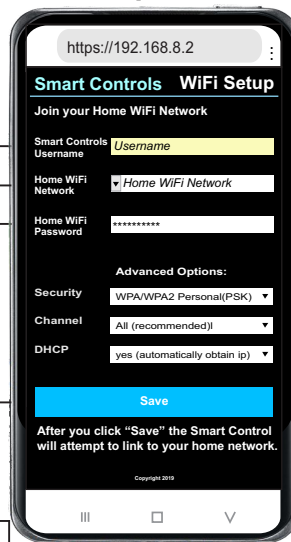

http://192.168.8.2
Some Apple phones may need to use this address.

- Press GO on the keyboard to open the WiFi Setup page.

When entering your username and password, make sure your device hasn't autofilled or autocapitalized.

- Tap in Username and type in your username.
- Tap the Home WiFi Network box and select your Home WiFi Network.
- Tap the Home WiFi Password box and type in your WiFi password.

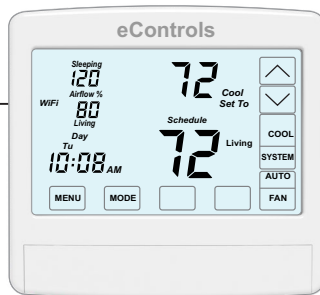

- Click SAVE.
- When the following message appears, click OK.

192.168.8.2 says Settings were saved, the device has returned to operating mode, you may close this page. **OK**

- Tap the Home button on your device to close the WiFi Setup page.

WiFi turns solid when the thermostat is linked to the home network.

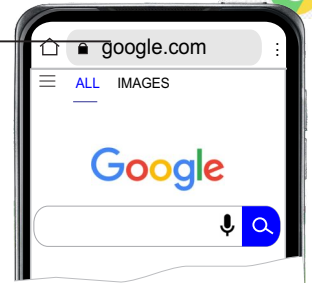

Log In to Your Account

- Open a web browser. Google Chrome is recommended.

- In the address bar type:
365-us.com
For Android or Apple phones

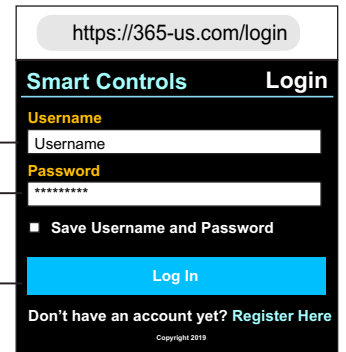

http://365-us.com
Some Apple phones may need to use this address.

- Press GO on the keyboard to open the Home page.

If Login page is displayed, enter your username and password..

- Tap Username and type in your Username.
- Tap Password and type your Password.
- Tap Log In to open the Home page.

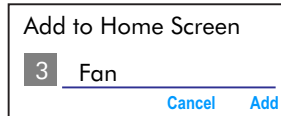

Add your EvenAir thermostat to your Home Page

For easy access to your EvenAir WiFi account, add an icon to your device home page.

- Android - Tap the 3 vertical dots near the address bar.
iPhone - Tap the Action menu at the center bottom.

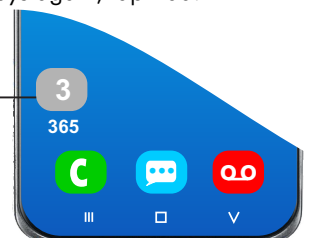

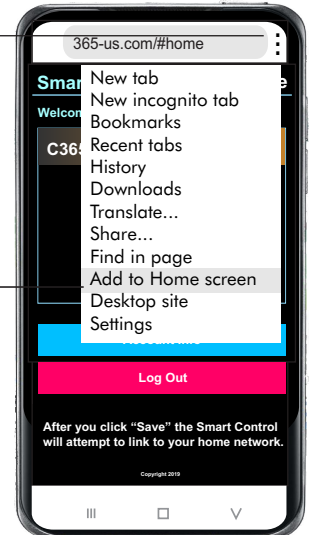

- The following box or similar displays. Select Add to Home screen.

- The following message or similar displays. Rename if desired. Tap Add.

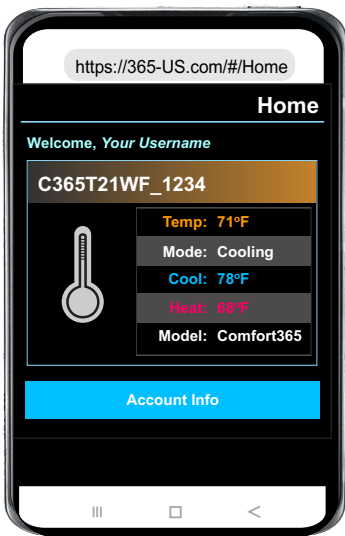

- If the Add to Home Screen? displays again, tap Add.

- Now, simply tap on the App icon to access your whole house fan WiFi account.

be found on the Model Number label on the bottom of your thermostat or on the Thermostat Installation and User Manual.
